Subject Index of Volume 45

Aluminum
electron diffraction studies of stage-2 $AlCl_3$-GIC, 27
Ammonia
conducting polymer interaction with gaseous substances; polyaniline–H_2O, polyaniline–NH_3, 235
Azaazulenium
preparation and properties of TCNQ radical-anion salts with, and diazaazulenium ions, 213

Carrier mobility
structural basis for high, in conjugated oligomers, 163
Chain length
-dependent polaron (P^-) width in phenylenevinylene oligomers; solid state ENDOR investigation, 49
Chain unsaturation
static SIMS of polyacetylene; effect of, 227
Charge-transfer salts
optical phase transition in thin films of highly conducting: Ag and Cu 2,5-dimethyl-*N*,*N*′-dicyanoquinonediimine, 71
Chemical oxidative polymerization
polypyrroles prepared by, at different oxidation potentials, 151
Composite polymer
solid electrolytes, blend-based and, 373
Conducting polymer(s)
functional dopants in, 363
highly electrically, blends, 261
interaction with gaseous substances; polyaniline–H_2O, polyaniline–NH_3, 235
metallic behaviour in highly, 183
size-limited conductivity in submicrometre metal particles; similarities with? 197
Conductive polymer(s)
dispersion hypothesis and non-equilibrium thermodynamics; key elements for materials science of, 119
structure and morphology: relation to thermopower properties of, 173
Conductivity
size-limited, in submicrometre metal particles; similarities with conducting polymers? 197
Conjugated oligomers
structural basis for high carrier mobility in, 163
Conjugated polymers
light and heavy excitonic polarons in, 107
Copper
optical phase transition in thin films of highly conducting charge-transfer salts: Ag and Cu 2,5-dimethyl-*N*,*N*′-dicyanoquinonediimine, 71
Crystalline surface structure
of Pt, influence on electropolymerization of 3-methylthiophene, 297
Cyclic voltammetry
poly(3-alkylthiophenes) and poly(4,4′-dialkyl-2,2′-bithiophenes); comparative study by impedance spectroscopy and, 81

Diazaazulenium
preparation and properties of TCNQ radical-anion salts with azaazulenium and, ions, 213
2,5-Dimethyl-*N*,*N*′-dicyanoquinonediimine
optical phase transition in thin films of highly conducting charge-transfer salts: Ag and Cu, 71
Dispersion hypothesis
and non-equilibrium thermodynamics; key elements for materials science of conductive polymers, 119

Electrical conductivity
of layered transition-metal P trisulfide crystals, 203
Electrochemical behaviour
of polypyrrole–poly(ethylene terephthalate) composite films, 221
Electrochemical doping
electrode kinetics of solute redox cou-

ple reactions during, of electron-conducting polymers, 309
Electrochemical studies
on materials with ladder-like structure, 353
Electrochemistry
formation and, of polyaniline in ambient-temperature molten salts, 1
Electrode
reactions at hydrophilic polymer electrolyte/electrode interface, 395
Electrode kinetics
of solute redox couple reactions during electrochemical doping of electron-conducting polymers, 309
Electrolyte(s)
blend-based and composite polymer solid electrolytes, 373
ion association in polymer; transport and materials optimization, 267
proton polymeric; review, 323
reactions at hydrophilic polymer electrolyte/electrode interface, 395
Electron-conducting polymers
electrode kinetics of solute redox couple reactions during electrochemical doping of, 309
Electron diffraction studies
of stage-2 $AlCl_3$-GIC, 27
Electropolymerization
influence of crystalline surface structure of Pt on, of 3-methylthiophene, 297
ENDOR
chain length-dependent polaron (P^-) width in phenylenevinylene oligomers; solid state ENDOR investigation, 49

Functional dopants
in conducting polymers, 363

Graphite intercalation compound
electron diffraction studies of stage-2 $AlCl_3$-GIC, 27

Heterogeneous conducting polymeric systems
dispersions, blends, crystalline conducting networks, 289
Hydrophilic polymer electrolyte
/electrode interface, reactions at, 395

Impedance spectroscopy
poly(3-alkylthiophenes) and poly(4,4′-dialkyl-2,2′-bithiophenes); comparative study by cyclic voltammetry and, 81
Ion association
in polymer electrolytes; transport and materials optimization, 267
Iron chloride
polymerization of pyrrole on polyether, polyester and polyetherester–Fe(III) chloride coordination complexes, 335

Ladder-like structure
electrochemical studies on materials with, 353

Magnetic properties
of TTF-TCNQ conductive networks in reticulate-doped polymers, 15
Metallic behaviour
in highly conducting polymers, 183
Metal particles
size-limited conductivity in submicrometre; similarities with conducting polymers? 197
N-Methylpyrrole
in situ characterization of copolymer of pyrrole and, at microarray electrodes, 241
3-Methylthiophene
influence of crystalline surface structure of Pt on electropolymerization of, 297
Microarray electrodes
in situ characterization of copolymers of pyrrole and *N*-methylpyrrole at, 241

Optical phase transition
in thin films of highly conducting charge-transfer salts: Ag and Cu 2,5-dimethyl-*N*,*N*′-dicyanoquinonediimine, 71
Organic solids
spectral studies as source of new information on various interactions in radiation-damaged low-dimensional, 279

Phenylenevinylene oligomers
chain length-dependent polaron (P^-) width in; solid state ENDOR investigation, 49
Phosphorus trisulfide
electrical conductivity of layered transition-metal P trisulfide crystals, 203

Phthalocyaninato–metal complexes
tetrazine-bridged, as semiconducting materials, 59
Platinum
influence of crystalline surface structure of Pt on electropolymerization of 3-methylthiophene, 297
Polaron(s)
chain length-dependent polaron (P^-) width in phenylenevinylene oligomers; solid state ENDOR investigation, 49
light and heavy excitonic, in conjugated polymers, 107
Polyacetylene(s)
influence of additional sp^3 defects on thermopower of stretch oriented highly conductive new, 405
precursor route to ethenyl-substituted; synthesis of homopolymers of *o*-trimethylsilylethers of 1-alkyl and 1-aryl substituted but-3-yn-1-ols; desilylation, dehydration and pyrolysis to conducting films, 249
static SIMS of; effect of chain unsaturation, 227
Poly(3-alkylthiophenes)
and poly(4,4′-dialkyl-2,2′-bithiophenes); comparative study by impedance spectroscopy and cyclic voltammetry, 81
spectroscopic studies of poly(4,4′-dialkyl-2,2′-bithiophenes) — 'head-to-head' analogues of, 385
Polyaniline
conducting polymer interaction with gaseous substances; PANI–H_2O, PANI–NH_3, 235
formation and electrochemistry of, in ambient-temperature molten salts, 1
Poly(4,4′-dialkyl-2,2′-bithiophenes)
poly(3-alkylthiophenes) and; comparative study by impedance spectroscopy and cyclic voltammetry, 81
spectroscopic studies of; 'head-to-head' analogues of poly(3-alkylthiophenes), 385
Polyester
polymerization of pyrrole on polyether, polyester and polyetherester–Fe(III) chloride coordination complexes, 335
Polyether
polymerization of pyrrole on polyether, polyester and polyetherester–Fe(III) chloride coordination complexes, 335
Polyetherester
polymerization of pyrrole on polyether, polyester and polyetherester–Fe(III) chloride coordination complexes, 335
Poly(ethylene terephthalate)
electrochemical behaviour of polypyrrole–poly(ethylene terephthalate) composite films, 221
Polymer electrolytes
ion association in; transport and materials optimization, 267
Polymeric electrolytes
proton; review, 323
Polymeric systems
heterogeneous conducting; dispersions, blends, crystalline conducting networks, 289
Polymerization
of pyrrole on polyether, polyester and polyetherester–Fe(III) chloride coordination complexes, 335
Polypyrrole(s)
electrochemical behaviour of polypyrrole–poly(ethylene terephthalate) composite films, 221
prepared by chemical oxidative polymerization at different oxidation potentials, 151
protonation and deprotonation of polypyrrole chain in aqueous solutions, 35
Protonation
and deprotonation of polypyrrole chain in aqueous solutions, 35
Proton polymeric electrolytes
review, 323
Pyrrole
in situ characterization of copolymers of, and *N*-methylpyrrole at microarray electrodes, 241
polymerization of, on polyether, polyester and polyetherester–Fe(III) chloride coordination complexes, 335

Radiation
spectral studies as source of new information on various interactions in radiation-damaged low-dimensional organic solids, 279

Reticulate-doped polymers
magnetic properties of TTF-TCNQ conductive networks in, 15

Secondary ion mass spectrometry
static SIMS of polyacetylene; effect of chain unsaturation, 227
Semiconducting materials
tetrazine-bridged phthalocyaninato–metal complexes as, 59
Silver
optical phase transition in thin films of highly conducting charge-transfer salts: Ag and Cu 2,5-dimethyl-*N*,*N*′-dicyanoquinonediimine, 71
Solute redox couple reactions
electrode kinetics of, during electrochemical doping of electron-conducting polymers, 309
sp^3 defects
influence of additional, on thermopower of stretch oriented highly conductive new polyacetylene, 405
Spectral studies
as source of new information on various interactions in radiation-damaged low-dimensional organic solids, 279
Spectroscopic studies
of poly(4,4′-dialkyl-2,2′-bithiophenes) – 'head-to-head' analogues of poly(3-alkylthiophenes), 385
Structure and morphology
relation to thermopower properties of conductive polymers, 173

Tetracyanoquinodimethane salts
preparation and properties of TCNQ radical-anion salts with azaazulenium and diazaazulenium ions, 213
Tetrazine
tetrazine-bridged phthalocyaninato–metal complexes as semiconducting materials, 59
Thermodynamics
dispersion hypothesis and non-equilibrium thermodynamics; key elements for materials science of conductive polymers, 119
Thermopower
influence of additional sp^3 defects on, of stretch oriented highly conductive new polyacetylene, 405
Thermopower properties
of conductive polymers; structure and morphology; relation to, 173
Transition metal
electrical conductivity of layered transition-metal P trisulfide crystals, 203
o-Trimethylsilyl-ethers
precursor route to ethenyl-substituted polyacetylenes; synthesis of homopolymers of *o*-trimethylsilyl-ethers of 1-alkyl and 1-aryl substituted but-3-yn-1-ols; desilylation, dehydration and pyrolysis to conducting films, 249
TTF-TCNQ
magnetic properties of, conductive networks in reticulate-doped polymers, 15
